

# Ultiflow

New Zealand

*A division of Ultibend Industries Ltd*

## **Ultiflow's HDPE pipes and fittings offer you the following advantages:**

- We have a complete product range from 40mm to 315mm, and larger sizes can be made to order.
- High quality approved products which are designed and manufactured to exacting International and Australasian standards. Ultiflow HDPE drainage pipes and fittings have Watermark approval and DIN 19537.
- High resistance to chemicals, as well as organic and inorganic solvents.
- Temperature resistance: HDPE can resist temperature from -40° to +95°
- Resistant to mechanical stress due to high elasticity, flexibility and impact resistance. This makes HDPE particularly suitable for installation in unstable ground.
- Fully corrosion resistant. HDPE is also resistant to build up or scaling due to its smooth inner surface and chemical properties.
- Ease of installation, maintenance and repair.
- Comprehensive product and installation training.
- Welding equipment available: Sales, hire, repair and calibration of associated equipment.
